7.1.3 D

E-Waste Management in HEI

Nirmala College of Commerce has implemented a systematic e-waste management system to address the disposal and recycling of electronic waste. The college ensures that all outdated or non-functional electronic devices, such as computers, printers, and mobile phones, are properly collected and segregated. These items are then handed over to certified e-waste recycling vendors, who follow environmentally responsible procedures for disposal and recycling. By doing so, the college minimizes the harmful impact of e-waste on the environment and promotes the reuse of valuable materials from electronic products. This initiative is part of the college's broader commitment to sustainability and responsible waste management.
